Frequent Questions about who counts in your household

Who counts in your household?

» Count every person living or staying in your home on April 1, regardless of their nationality or living situation, and no matter where they are from, what language they speak, or citizenship status.

» People without a permanent residence who are staying temporarily with a friend or family on April 1 should be counted at that address.

» If you are a renter, count yourself where you live. Don't forget any family or roommates living there. Everyone needs to be counted.

» Count all children, including babies, who usually live and sleep at your home. If they split time evenly between two households, count them where they are on April 1.

» College Students not living in a dorm should be counted at their off-campus address, even if they go to their parents' home for school breaks.

» If you recently moved, count yourself at your new address if you move by April 1.

» Service members who don't live in military barracks and aren't deployed or stationed outside the U.S. should be counted where they live and sleep most of the time.

» Residents of a group facility: the Census Bureau will work with representatives to ensure people living in college dorms, nursing homes, group homes, shelters, psychiatric facilities, correctional facilities, and military barracks are counted.

Frequently Asked Questions:

I need to complete the 2020 Census for someone else. How do I respond? You may help if asked, or if you are a legal guardian or executor. Answer the questions the way the person living at that address would.

Should I still count grandchildren living with me if their parents do not live or stay here? Yes. All children, including babies, should be counted at their usual residence, even if their parents do not live and sleep at the same address. The usual residence is where the child lives and sleeps most of the time. If you are not sure, count them at the address of the place where the child was staying on April 1, 2020.

Does the census count the children of roommates, housemates, roomers, or tenants? Yes, the children of roommates, housemates, roomers, and tenants should be counted at their usual residence. This means where the children live and sleep most of the time. If you are not sure, count them at the address of the place where they were staying on April 1, 2020.

Why am I being asked about my neighbor's address? If the Census Bureau cannot contact someone about an address, we may ask their neighbors for assistance. During each census, some homes that appear vacant actually have people living there. Verifying whether a home is vacant helps us count everyone.

Does the 2020 Census ask about citizenship status? NO. The 2020 Census does not ask whether you or anyone in your home is a U.S. citizen.

Are non-citizens counted in the census? YES. Everyone counts. The 2020 Census counts everyone living in the country, including non-citizens. Learn more about who should be counted when you complete the 2020 Census.

Can my answers be shared with law enforcement or used against me? NO. The law prevents the Census Bureau from sharing your information with law enforcement. Your answers cannot be used to impact your eligibility for government benefits. Your answers are only used to create statistics about our country. The Census Bureau is bound by Title 13 of the U.S. Code to protect your personal information and keep it strictly confidential. That's every answer, to every question.

Can we only respond to the Census via the internet? NO. You can respond to the Census via the internet, over the phone in 13 languages, and via mail.

BE AWARE OF SCAMS. The Census Bureau will never ask you for:

- Your Social Security number.
- Money or donations.
- Anything on behalf of a political party.
- Your bank or credit card account numbers.

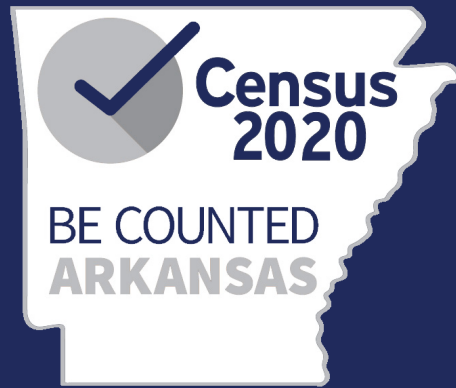

If someone claiming to be from the Census Bureau contacts you via email or phone and asks you for one of these things, it's a scam, and you should not cooperate. For more information, visit [Avoiding Fraud and Scams](#).
